

Great Britain's population of about 46,750,000 (9,000,000 of which are children under 14 years of age) had up to November 24, 1942, contributed the sum of £4,668,904,000 (\$20,869,533,760) in war loans, saving schemes and free gifts.

VOLUME 22, No. 14

THE JOURNAL, COLEMAN, ALBERTA THURSDAY, AUGUST 19, 1943

\$2.00 Per Year; Single Copy 5c.

British people are contributing almost 60% of the national income for war purposes. This means self-denial of all luxuries and many necessities, a drastic reduction in the standard of living.

## Youth Fatally Injured In Mine Accident Friday

Inquest Held Friday Evening; Find Death Accidental; Jury Asks More Attention Given Locomotive Brakes In Future.

John Vanhoff, 20, was fatally injured at International mine on Friday morning while employed as a locomotive engineer. In the opinion of the coroner's jury, deceased was accidentally killed while trying to stop his moving air locomotive, and while doing so struck his head on a boom.

Deceased was born at Castlegar in December, 1922. He came to Coleman about two years ago, where he secured work at McGillivray Creek mine. In April of this year he left McGillivray and started to work at International.

He was married in February, 1942, to Miss Julia Dorusak, of East Coleman. Surviving are his wife and a grandmother, the latter at Castlegar.

The body was shipped to Castlegar on Saturday evening, burial taking place at that B.C. town. Accompanying the body were his widow and her mother, Mrs. Joe Dorusak.

The inquest was held in the court chamber on Friday evening and the coroner's jury returned a verdict of accidental death.

The jury added, however, that special attention should be paid to locomotive brakes in future, as it was their opinion the accident was caused when the brakes on the locomotive failed to hold while it was proceeding down a four-degree incline, where the accident occurred.

Coroner Donald MacPherson presided. Jurors were J. R. Kerr, A. Fry, P. Antrobus, H. J. Clark, J. Icosky and W. Bobbitt. Also present was the district mines inspector E. H. Morgan, of Blairmore.

## 34,700 Trout Placed In Pass Streams and Rivers

Measure From Four to Nine Inches; Streams Stocked Two Weeks Ago.

Resulting from a story published in The Journal last week regarding agitation for a fish and game warden to be stationed permanently in the Pass towns, Fish Warden Yates, of Pincher Creek, sent The Journal the following information which should instill joy in the hearts of all Pass fishermen.

Two weeks ago the provincial fisheries department placed 34,700 young trout measuring in size four to nine inches in Pass waters. These fish were placed in the following streams and lakes: Crows' Nest River 9,000, Castle River 3,000, Old Man River 10,800, Race Horse 1,200, Fly Creek 500, Todd Creek 1,300, Earnest Creek 500, Camp Creek 500, Burnis Lake 500, Mill Creek 800, Beaver Mines Creek 1,200, Beaver Creek North 1,000, Pincher Creek 1,100, Beauvais Lake 800, Davis Creek 200.

## QUEEN THANKS SOCIETY FOR DONATION

Miss Myrtle Johnston, secretary for the Clan Dannachaidh Society of Coleman, has received the following from Buckingham Palace: "Buckingham Palace June 5th, 1943.

"The Lady-in-Waiting is commanded by The Queen to thank the officers and members of the Clan Dannachaidh Society of Coleman, Alberta, for the money order for twenty-five pounds eleven shillings and seven pence which they have so kindly sent to Her Majesty, to be donated to a war charity.

"This most generous gift of money was used to help bombed-out families who have lost everything they possess through enemy action over this country. The Lady-in-Waiting is to say how deeply touched The Queen is by the kind generosity of all concerned, and to send Her Majesty's very good wishes."

## VOLUNTEERS WANTED

On Tuesday, Wednesday and Thursday, Aug. 24-25-26, the No. 3 Ration Books will be distributed at Antrobus' office. A great deal of work is involved and it would be appreciated by Mr. and Mrs. Antrobus and the Town Council if ladies having a spare hour or two during those days would volunteer to help in distributing the books. Please list names with Mrs. Antrobus.

## Fruit Ceiling Prices

New wholesale ceiling prices on peaches, plums and pears, announced by the Wartime Prices and Trade Board, are now set for Alberta, the regional office announces. It is anticipated that the reduction in wholesale ceiling prices will reflect a considerable reduction in prices at retail.

Wholesale ceiling prices for the province are:

Peaches, grade 1, standard box, \$1.52, and grade, 2 standard box, \$1.25.

Plums and pears all grades and varieties, standard lug, are \$1.07.

Pears, extra fancy Anjou, standard box, \$3.28; fancy Anjou, Bartlett, Bosc and Wintermills varieties, \$2.83; C grade, Bartlett, Bosc and Wintermills pears will sell at \$2.38 a box, as will fancy Flemish Beauties and all other varieties. C grade Flemish Beauties and all other varieties wrapped are \$2.04, and unwrapped \$1.90.

Wholesale distributors or truckers or grocers selling at wholesale may add to their laid down cost a maximum mark-up of 12 1/2 per cent of the selling price.

On retail sales the maximum mark-up is 25 per cent of the retailer's selling price.

These prices apply to both domestic and imported fruit, officials pointed out.

Also wholesalers and retailers who have stock on hand may dispose of it before Aug. 21. The wholesaler may add 12 1/2 per cent mark-up to the delivered cost, plus transportation. The retailer is allowed a 25 per cent mark-up.

## THEATRE NOTES

"Springtime in the Rockies," a song and dance picture filmed in the scenic beauty of Alberta's own Lake Louise, comes to the Palace this week end. Stars are the lovely and talented Betty Grable, with a brilliant supporting cast of John Payne, Carmen Miranda, Cesar Romero and Harry James and his music masters. A love story between Payne and Grable is intertwined between the rhythm and laughter of music and dance at famous Lake Louise. All scenes are in technicolor.

At Cole's, Bellevue, this week end, Canada's own Deanna Durbin stars in the role of "The Amazing Mrs. Holliday." Once again she thrills you with her lovely voice and superb acting. Supporting her are Edmond O'Brien, Barry Fitzgerald, and Arthur Treacher.

At the Orpheum, Blairmore, there is a double program. The main feature is entitled "Chetniks," a band of fighting guerrillas. They sabotage by day, raiding by night, to strike the enemy in a thousand places. The action is set in the Balkan mountains. Starring are Philip Dorn and Anna Sten. The second feature is entitled "Moonlight in Havana."

## GOLF TOURNAMENT ON SUNDAY

On Sunday, Aug. 22, Crows' Nest Pass Golf and Country Club will sponsor a golf contest for its members.

Featured events will be a mixed 2-ball foursome, hidden hole competition and a pitch and putt contest.

Refreshments will be served in the afternoon.

## Tons of Silk Hosiery

Over 18,000 pairs of ladies' silk and nylon hose, weighing 445 tons, have been turned in to the Government.

## How The Cost Of Living Index Works

By Jim Greenblatt

In the House of Commons, July 7, the Honorable J. L. Halsey, Dominion minister of finance, gave some time to the explanation of the cost-of-living index, particularly interesting in the light of present discussions of food prices. Jim Greenblatt gives the gist of Mr. Halsey's remarks, in non-technical language as follows:

The cost-of-living index as related to the cost-of-living bonus does not directly worry the farmer, small proprietor and such like, but indirectly everyone should have the low down in their minds about this important part of our national economy if they don't wish to get too provincial in their thinking.

Let's review the matter informally so you'll remember it without any effort. The cost-of-living index measures the month-to-month change in the cost of living of the average typical wage-earner's family, by the Bureau of Statistics. It is based on a full year record, made in 1937-38 on 1,500 Canadian families, averaging 4.6 persons with an average income of \$1,453. The index was in six main groups, showing food to take 31% of the income, fuel and light 6%, housing 19%, clothing 12%, home furnishings and services 9% and miscellaneous 23%.

### Keeping Pace

Folks may howl that living conditions have changed a lot since 1937-38. True! The Bureau knows that, and it makes the necessary changes. For example, after sugar rationing came in the amount of sugar in the index was reduced. Then, when cheap lines are off the market, making you fork over more for more expensive articles, the price of these is considered in the index.

The index records variations in the cost of a fixed standard of living in urban areas. It does not measure the increased costs of people who improve their standard of living.

Not without logic, some people ask why does the index only show a rise of 17% during the war, when such items as stewing beef rocketed up 78%, lard 73%, for example. The fact of the matter is, of course, that all foods comprise less than a third of the whole cost of living index, and we have to look at it in that perspective. Many foods, too, and important ones, have risen much less. For instance, bread, sugar and such foods have remained fairly steady and milk is reduced in price.

### Food Prices Up

It is interesting to note in passing that cost of food rose 31.8 since the war started, most of it since the ceiling was slapped on. Mrs. Housewife obviously is more aware of this, because it's in the kitchen and personal problem. But on items hubby pays for mainly, the rise shows in the lower brackets, i.e. fuel and light, 14.1; housing, 7.4; clothing 20.3. The total cost of living index rose 17.6 since August, 1939, but only 2.2 of it since application of the price ceiling.

To keep track of changes, the Bureau not only relies on price reports from storekeepers, but uses information from their regional setups. And don't think for a minute that representatives fail to visit. They do, definitely.

### Questions of Quality

Mom complains about changes in quality, deterioration of clothing and home furnishings, noticeable in our wartime economy. Well, the Bureau thinks of that, too, and treats the reduction in quality as if it was a price increase of the same amount.

You can see for yourself that they can't get direct price quotations on every item in the family budget, but what they do is to get the typical, and "weigh" those prices sufficiently to cover all items in any group.

To get a slant on the problems, let's look at foods. Many foods have a wide seasonal price fluctuation as you know. Then again, all vegetables aren't sold on a weight basis. Some are sold in bunches, and so the price may vary according to the quantity. If some "average" system wasn't adopted, the index would certainly be "less" than "more" accurate. What they do is pick representative prices month-to-month, which includes some 44 food items amounting to just about 75% of the total cost of food.

### How Much for a Hat?

Well, now we come to such items as clothing. This brings up another difficult problem and no fooling, it's an erratic thing. You know what it's like yourself. You've gone in and bought a lady's hat for say \$4.99, carrying a month later to see carrying it over into winter you see it advertised to clear at \$1.98. It does happen with coats, dresses and other items. Therefore, the Bureau, and rightly, has selected a smaller list of some 29 clothing items of fairly standard construction which have no pronounced seasonal movements. These items represent all the more important materials in making clothing, such as cotton, wool, rayon, rubber, leather.

Just one more thing, income taxes are not included in the reckoning of the cost-of-living index. These taxes do not affect prices, although they do, of course, reduce the amount available for spending. The whole idea of having an income tax is so that everyone can contribute to the cost of the war according to their ability to pay. If income taxes were included in the cost-of-living index, that would raise the cost-of-living bonus. And those people who get the bonus would therefore get their tax, or most of it, paid back to them. But some people—farmers, small proprietors, domestic servants, etc.—don't get the bonus, so they would not get any tax back. You can see how unfair that would be.

## CPL. NORM. YOUSCHUK SAYS THANKS FOR CIGARETTES

Cpl. Norman Youschuk, RCAF, who last week returned home after more than a year spent overseas, was in the Legion club room last week and thanked the Legion members, the Ladies' Auxiliary and the public in general for the gifts of cigarettes and parcels sent him during his service overseas. He stated he had met a number of local men in Britain, who, upon hearing he was about to return home, asked him to voice their thanks for the cigarettes and parcels.

Cpl. Youschuk will soon start training as a pilot.

## Letters to the Editor

Editor, The Journal.

Dear Sir: It was with a great deal of interest that I read an article in the Aug. 12 issue of the Coleman Journal regarding the need of a Fish and Game warden for the Crows' Nest Pass area.

When I think of the Crows' Nest Pass district in regards to game and fish, I have in mind the Crows' Nest Forest Reserves and adjacent areas, which roughly are from the B.C. boundary to Pincher Creek, and from Waterton Park boundary to the Bow Forest Reserve boundary, approximately 33 miles east and west, and 72 miles north and south, or in other words an area of at least 2,000 square miles.

I am informed that the game warden in charge of the district resides at Lethbridge. It would be reasonable to suppose that Lethbridge was chosen as a central point in the district laid out for him to police. It is very likely that his district covers the whole southern part of the province. It is little wonder then that many of us have never been asked to produce a game license or have our bugs checked.

I would say that a warden located at Lethbridge was at least a hundred miles from the big game ranges, and if he was on the go every day of the year there would still be places where game frequented that he had not visited. Thousands of miles would have to be covered by car, hundreds of miles of travel would have to be covered on horseback or on foot.

The same thing applies to the fish warden. Occasionally we are asked to produce a fishing license, but that is nearly always near some highway bridge or ranger station, seldom in the isolated places. He also has too much territory to cover to adequately check his district. Most closed streams would have to be covered on foot, and I am sure some of them are never visited.

Under the present setup, the forestry service probably does more to maintain our wild life than the game and fish wardens, but these men have a full-time job attending to forestry duties and cannot be expected to adequately protect our game and fish.

Outside of parks, I do not believe there is any other area equal in size in Alberta where so many different varieties of game can be found, as well as having hundreds of miles of good trout streams, all within reach of a few hour travel by car or a day's trip by pack-trail, and where there are more fishermen or more hunters per capita? No where!

Yet we have no resident warden who is to blame? Nobody but ourselves! If we were really interested in preserving our wild life, we would have a fish and game association. I do not mean a fish and game club which we have seen in the past, and possibly the majority of us have been members at one time or another. These clubs thought more about competitions and smokers than about preservation.

In other parts of the province there are well organized associations, which really study the problems and are represented at the Alberta Game Warden, where their recommendations are considered and they usually get what they ask for, such as opening or closing districts, or changing bag limits.

My own opinion is that there is a great need for more adequate protection, both for game and fish. (Continued on Page 4)

## Antrobus' Office Distributing Centre For Ration Books

Citizens Asked to Fill Out Card Properly Before Presenting For New Book; Workers Wanted.

On Tuesday, Wednesday and Thursday, Aug. 24 to 26, between the hours of 10 a.m. to 12 noon and 1.30 to 5.30 p.m. the new No. 3 ration books will be distributed at Antrobus' office on main street.

An appeal is being made for volunteer helpers to aid in the distribution of the books. Names should be listed with Mrs. Antrobus, who will instruct them as to their duties and hours of work.

Citizens are asked to give the following instructions careful study:

### Instructions

To obtain Ration Book 3, it is necessary to present ration Book 2, with information completed in the post card at the back. Officials remind that it is wrong to tear out the post card in the back of book 2 and mail it to ration offices and local ration boards, as some people are doing now. These are the rules:

Print prefix letters, serial number of your ration book, name, address, and age if under 16, on the post card in the back of ration book 2.

Present ration book 2 to the recorders at the distribution centre, from which you will get your new book. Recorders check information on the post card with that on the cover of book 2, then transcribe this information to cover of book 3, detach and retain the post card. Receive new ration books and take them home. Do not destroy ration book 2, because brown Spare "A" coupons for meat are good until November 25.

A member of the family, if over 16 years old, or a responsible member of the community may present ration books of his family or friends to obtain ration books.

How Travelers Get Ration Books. Travellers or visitors may obtain ration books from any distribution centre in Canada, provided they have the proper information filled in on the post card at the back of ration book 2. They must present the current book at the distribution centre, with the post card intact, stating name, address, prefix letters and serial number of book 2.

...

## Citizens Asked to Aid Chinese War Relief Fund

Newspapers And Radio Stations Throughout Dominion Support Campaign; Royal Bank Pass Receiving Agency.

A campaign is in progress throughout the Dominion to raise a million dollars for the Chinese Relief Fund. For six long years the brave Chinese people have fought stubbornly against the Jap invader, suffering untold hardship and torture from a barbarous foe, but steadfastly refusing to submit to the invader.

The campaign is being aided by newspapers and radio stations throughout the Dominion, as well as the Royal Bank of Canada. Persons desiring to help these noble Chinese people continue the struggle against the Japs are asked to send their contributions to either the Royal Bank of Canada branch at Blairmore or The Calgary Herald.

Last week the Chinese citizens from Pincher Creek to Michel-Natal had a collection among themselves, the minimum donation being not less than \$6.00. Over \$200 was raised among the approximately 30 Chinese in the district.

### INTERNEED IN JAPAN

"Reported" to have been interned in Japan, is the latest information received by Mrs. C. Maurer regarding the whereabouts of her youngest son, Charles, who was captured by the Japs soon after the opening of hostilities in the Philippines.

FRENCH VOLUNTEERS TRAIN IN NORTH AFRICA

Since the Allied campaign opened in North Africa, Frenchmen have been volunteering for service against the Germans in large numbers. Many of them fought in the battles of 1939-40 and some have been prisoners in enemy hands. They are being trained as soldiers of the Corps Afrique and are dressed in British khaki and are equipped with British weapons. They retain as a distinguishing mark the French Casque and Forage cap. On the cap they wear a Red, White and Blue Flash for England and on their sleeve the colors of France. Their training is in the hands of British NCO's with Front Line experience. Picture shows a Frenchman who has volunteered to fight with the British in North Africa against the common enemy.

# Picobac

It's a mild..cool..  
sweet smoke

GROWN IN SUNNY, SOUTHERN ONTARIO

## Youth And The War

**PUBLIC ATTENTION** Has frequently been drawn to the important part played by youth in the present war. The lightning pace of modern warfare appears to demand the strength and alertness of young men, and they are responding splendidly to the demands which are made on them at this time. Precedent has been broken many times recently by the appointment of men under twenty-five to posts as high ranking officers, and Canada and all the United Nations have already honored veterans and heroes of this war who are only twenty or twenty-one years of age. Youthful fliers who took part in the Battle of Britain turned the course of the war in 1940, and they have fought ever since for the air supremacy which has made possible the present great Allied offensive. Many of our young soldiers, seamen and airmen have lost their lives, others are disabled for life, and some are spending the long months of the war in enemy prison camps. They are giving their service with a bravery and determination which would in normal times be considered beyond their years and they deserve credit and honor for their deeds.

### Free Education For Army Men

There is full realization here of the contribution which the young men of Canada are making towards the winning of the war, and our post-war reconstruction plans include provision for returned service men to complete their interrupted educations or to receive special vocational training. At present much is being done to provide facilities for those in the services to improve their educations and there is also provision for young men in the army between the ages of seventeen and twenty-two to enter universities for courses in mathematics, physics and engineering. Eleven Canadian universities are participating in this plan, under which free tuition, board and room, text books and medical care are provided. Students benefitting by it must have the required qualifications for entering a university, and they must take military training. On completing their studies they are immediately eligible for officer training. There is also provision that should their courses be interrupted at this time, full credit for the work they have done will be given to them after the war.

### Advantages Of Plan Are Many

It is believed that while there are many who will be unable to take advantage of this opportunity because of the standard of education required and the age limits, there are a number of young men in the Canadian army who will benefit by it. The advantage of the arrangement to those who are able to take part in it will be many. It is well known that in the past, and especially during the depression period, many young men of ability were prevented from securing a university education because of the lack of necessary funds. The generous terms of this new plan will give the students a splendid opportunity to pursue their studies free of financial worries, and it will give them a foundation on which to re-establish themselves after the war. It is felt that this may be just the beginning of an effort to provide the young men of the fighting services with tangible evidence that their worth to their country is fully realized and appreciated.

HEALTH LEAGUE OF CANADA

### CHEESE AS A MEAT SUBSTITUTE

These days you should use more cheese to replace the meat in your menus as it is a concentrated food, highly nutritious and stores well. On the market you will find Canadian cheddar cheese, sometimes called Canadian cheese, processed cheeses and those ripened by molds and bacteria. Today we will consider the cheddar cheese only as it is the least expensive and used most in these cookery. You can buy new, medium and old, depending on what flavour you desire. The nutritive value is the same for each, the cost increases with the age of the cheese due to the cost of storage.

Like milk, cheese is an almost perfect food furnishing protein in an efficient form, important building materials, calcium and phosphorus, vitamin A and the vitamin B complex. It also has a high fat content thus giving it a high energy value, one inch cube of cheddar cheese gives 100 calories.

When you are using the cheese just as a flavour or appetizer you should use the old cheddar as it has the strongest flavour. In your main dishes when you want the cheese to provide the energy and efficient protein you will need larger amounts of the cheese and so you will find the new cheese most economical.

Cheese is easily and completely digested if properly cooked or combined with other foods. It is a concentrated food rich in fat and protein, so it should be grated or used in combination with high carbohydrate foods. Cheese is slowly digested because of this high fat content and as a result is often erroneously believed to be indigestible. When cooking cheese you should be careful to overcook it as it becomes tough and rubbery and as a result is hard to digest. When properly cooked it has a spongy texture.

Store your cheese in a cool place and cover to prevent loss of moisture. Try this recipe on a day when you are not serving meat.

### CORN AND CHEESE CASSEROLE

1 cup canned corn  
1 cup bread or cracker crumbs  
1 cup grated cheese  
1/2 teaspoon salt  
2 cups scalded milk

Combine all ingredients except eggs and milk. Beat egg yolks and add with milk. Fold in stiffly beaten egg whites. Place in a greased baking dish and oven-pouch in a moderate oven (350 degrees F.) until set—about 40 minutes. Serves 4 to 6.

For further cheese dishes write to the Western Division Health League of Canada, 111 Avenue Road, Toronto, Ontario.

### COWBOYS USE PLANES

There's a new twist to the old western roundup—sky cowboys. Airplanes are being used to round up wild horses in a campaign supervised by the United States grazing service to rid southwestern Wyoming sheep and cattle ranges of the mustangs.

It is estimated that Canada will need 477,000,000 bushels of oats to meet export and domestic demand in 1943-44.

## Soil Composition

Important Work Accomplished By Agricultural Chemists

To the casual passer-by the soil of any farm may appear uniform but under the careful investigation of the soil scientists startling differences may soon become apparent. There may be mineral deficiencies, some soils may be more efficient for growing certain crops than others, and again some soils may be of little use to the farmer unless they are treated with the proper amount of the necessary fertilizers. One of the aims of the agricultural scientist is to make the most efficient use of the soil by determining the treatments necessary to get the most production.

Most Canadian soils require large amounts of phosphoric acid, and where this is added in the form of super-phosphate much of it becomes tied up in such a way that plants cannot use it. This is called phosphate fixation. The study of how to improve the utilization of the phosphoric acid of superphosphates has been one phase of the work of paramount importance to Canadian agriculture carried out by the Chemistry Division, Science Service, Dominion Department of Agriculture. Under present war conditions, the study is of special importance, because the supply of superphosphates is limited, chiefly on account of the restricted amount of sulphuric acid necessary in its manufacture.

An investigation on the sources of phosphoric acid as a fertilizer is also another of the main objects of the Division. Basic slag (a by-product in the manufacture of steel) has received particular attention. Chemical tests have indicated that, as a result of a change in processing much more of the phosphoric acid of the slag becomes available, and the Division is now undertaking studies to determine the fertilizing value of this modified product. In view of the fact that the annual production of slag at Sydney, N.S., is expected to be about 125,000 tons, and also that there is a need for larger quantities of phosphate fertilizers in Canada, the employment of the open hearth slag would be an important aid to increased production, if it can be shown that it is a useful source of phosphorus for plants.

In addition to studies in connection with soils and fertilizers, the work of the Division of Chemistry includes investigations on animal nutrition, plant chemistry and foods. Chemical analyses are also made for projects conducted by other Divisions of Science Service and the Experimental Farm Service and analyses are made in connection with the administration of the Meat and Canned Foods Act and the Maple Sugar Industry Act. The main laboratories of the Division are situated at the Central Experimental Farm, Ottawa, and regional laboratories are maintained at the Dominion Experimental Stations at Kentville, N.S., and Summerland, B.C.

## American Bases

Reported British Government Will Compensate Property Owners

The U.S. state department has announced that the British government has offered to assume the cost of compensating owners of private property involved in the establishment of American bases on western hemisphere sites acquired from Britain in the destroyers-for-bases deal of September, 1940.

In the original agreement, providing for the transfer of 50 destroyers to Britain in return for 89 years leases on bases in Newfoundland, Bermuda, the Bahamas, Jamaica, Antigua, St. Lucia, Trinidad and British Guiana, the United States undertook to compensate owners of private property for loss.

In taking over the cost of compensating private owners, the British government assumes the burden of paying for properties appraised at approximately \$5,500,000.

## FOR BEST RESULTS

## Naval Board

Acting Paymaster Commander Joseph Jeffery, R.C.N.V.R., of London, Ont., has been appointed secretary of the naval board. Commander Jeffery succeeds Captain R. A. Pennington, R.C.N.V.R., who has been assigned to duties with the Royal Canadian Navy in London, Eng.

## New Anson Bombers

Owns Many Improvements To Canadian Aircraft Engineers

There is plenty of skill and inventive ingenuity in Canada's aircraft industry.

Canada's new Anson bombers, the basically English bomber-trainer which has been re-designed for typically Canadian jobs and conditions, owes most of its changes and improvements to Canadian aircraft engineers.

An example is the windshield on the new Anson V, designed by the engineering staff of the Canadian Car and Foundry engineering department at Amherst, N.S. The new windshield is one of the new plane's major improvements, according to aeronautical engineers.

After a Canadian Car engineer designed the screen last fall, he went to Montreal for the fitting of it to the plastic demonstration fuselage that was used at that time in planning production of the new navigational trainer. There he watched the exciting tests which led to its acceptance.

The first model was made by hand in the Amherst plant with George Henderson supervising the jig and basic structure and Cecil Stiles in charge of assembling.

The new screen is so simple to manufacture that the time saving over the old screen has been estimated at 75 per cent.

## Scientific Studies

Clearing House For Information To Be Established

A committee of scientists, representing the English-speaking countries, to act as clearing house for information and reports, is expected to be named soon by the governments concerned, it was announced at Washington by Sir John Anderson, member of the British war cabinet, who is responsible for scientific wartime research in Britain.

In time, he said, other countries may be invited to name representatives on the international committee and he expressed the hope it would continue its functions in the post-war period, uniting scientific studies and research efforts in peace as they are in war.

The idea of the committee was advanced by the Royal Society in London and the British government has passed along the suggestion to the governments concerned.

Sir John, who will go from Washington to Ottawa, came to North America to further scientific collaboration among Britain, the United States and Canada. He said remarkable strides have been made in this direction and with Russia as well.

## Found The Trouble

Had A Bullet In His Head And Didn't Know It

Abraham Friedman, 48, of Montreal, went to see a doctor after an injury sustained almost three weeks before had failed to heal—and had a 22 calibre bullet removed from his forehead.

Friedman told Detective Sgt. Bonnier that he was walking along St. Lawrence near St. Catherine street in the central section of Montreal late on the night of July 17, when he felt something strike him on the head. The resulting bruise over his eyes did not respond to home treatment and eventually became painful.

Friedman went to see Dr. Benjamin Kolber who discovered and removed the bullet.

The U.S. gallon is 16% per cent. less than the British, or Imperial gallon.

## Recover Goods

Found Red Cross Stores In Hands Of Foo In Sicily

Among captured medical stores in Sicily, Canadian officials found some Canadian Red Cross supplies.

While clearing up captured hospital supplies from a warehouse in Leonforte about a dozen bales of pillows and sheets stamped "Canadian Red Cross Society, Quebec province branch," were uncovered.

They were sent to a Canadian general hospital in Sicily.

Maj. J. K. Bell of Sarnia, Ont., deputy assistant director of medical services, said: "It is pure supposition as to the source or reason of these stores being in enemy hands in Sicily, but there are two logical conjectures. The supplies may have been sent to our prisoners of war or to suffering people of the occupied countries such as Greece and transferred to Sicily."

## SMILE AWHILE

"Is old Angus a typical Scotsman?"

"He? He's saved all his toys for his second childhood!"

Bill—Did any one in your family ever make a brilliant marriage? Arthur—Only my wife.

Daughter—Daddy, dear, what is your birthstone? Daddy—I think it must be a grindstone.

"My son wants to be a racing motorist. What shall I do?" "I wouldn't stand in his way."

He—Isn't there anything I can do to stop you from giving me the cold shoulder? She—Sure; drape a sable wrap over it.

Daughter—Mother, I wish you would stop bossing Daddy around so much.

Mother—What's the matter now?

Daughter—Well, every time I get some nice boy interested in me he grows serious and asks me if I take after you.

Jagwell—What makes that hen in your backyard cackle so loud?

Wigway—Oh, they've just laid a cornestone across the street, and she's trying to make the neighbors think she did it.

Then there's the story about the woman who, when she got on the street car with 10 children, was asked by the friendly motorman if they were all her children or if it was a picnic.

"Yes," she snapped, "they're all mine, and it's no picnic." Tommy was meandering home-ward much later than his usual suppertime. A friend of the family who happened to meet him said: "Why, Tommy, aren't you afraid you will be late for supper?"

"Nope," replied Tommy, "I've got the meat."

One red rose met another red rose and said: "My, but you have been blooming a long time."

The other red rose replied: "Yes, and so have you. We're just a pair of long, red bloomers."

## National Library

An Institution Which Would Be Worthy Of Canada

In Ottawa the Parliamentary Library has grown until it is ready to burst its seams, and for want of room research is hindered. Books and documents which should be quickly available have to be sought for behind the others.

The joint committee of the library of Parliament does well therefore to recommend the establishment of a national library, out of the 350,000 volumes now existing. It should be an institution worthy of Canada, her past achievements, her present status and her future greatness.

As patriots, our Parliament should have no hesitation in proceeding with this project on a scale commensurate with our national aspirations and our visions of the future.—Hamilton Spectator.

## GEMS OF THOUGHT

SILENCE: ITS VIRTUE

Silence never shows itself to so great an advantage as when it is made the reply to calumny and defamation.—Addison.

There is an eloquent silence: it serves sometimes to approve, sometimes to condemn; there is a mocking silence; there is a respectful silence.—La Rochefoucauld.

Silence is the safest respondent for all the contradiction that arises from impertinence, vulgarity, or envy.—Zimmerman.

No reproach is so potent as the silent lesson of a good example.—Mary Baker Eddy.

Silence is the element in which great things fashion themselves together; that at length they may emerge, full-formed and majestic, into the delights of life, which they are henceforth to rule.—Carlyle.

He knows not how to speak who cannot be silent; still less how to act with vigor and decision. Who hates to the end is silent; loudness is impotence.—Lavater.

## GROW ON VINE

Norman Stewart, farmer at Reddickville, Ont., has a potato plant which has taken to sprouting the vegetable on the stalk. There are more than 30 potatoes on the one vine.

## GERMANS HAVE FAILED IN THEIR SUBMARINE PLANS TO BLOCK ALLIED SUPPLY LINES

WASHINGTON.—Prime Minister Churchill and President Roosevelt triumphantly announced that "a total of over 90 U-boats" were sent to the bottom of the seas during heavy fighting in May, June and July, an average of nearly one a day.

At the same time, the American and British leaders declared in a joint statement that the Nazis still have large reserve forces of undersea raiders and that the Allies can expect continued success in the all-important battle of supply lines to Europe only if the most effective measures possible are continued in force and even improved in results.

The statement said that the figures were prepared after consultation with the British admiralty, the United States Navy department and the Canadian department of national defence for naval services.

The statistics and tone of the statement seemed to make it clear that the one weapon on which Hitler had counted to keep his fortress of Europe impregnable had failed completely at the strategic time, due to the overwhelming success of Allied countermeasures.

Out of 2,500 vessels involved in the operations against Sicily and in moving large numbers of reinforcements following up the initial invasion, the report noted, only 80,000 tons had been lost.

Moreover, it was disclosed that new ships completed by the Allies in 1943 "exceeded all sinkings from all causes by upward of 3,000,000 tons." Hitler had relied on the submarine to sink so many British and Allied ships and destroy such quantities of munitions despatched from North Africa to the European theatre that it would be impossible for the Allies to bring the full force of their productive power to bear at the battle-front.

To this end months ago he appointed Admiral Karl Doenitz, a ruthless submarine warfare expert, to head the German navy and subordinated all other naval activities to those of submarine production and operation.

Principal weapons employed in crushing the undersea menace are escort aircraft carriers which take their air umbrella right along with the convoys, long-range, land-based patrol bombers which rove for hundreds of miles out over both the north and south Atlantic looking for submarines, and destroyer escorts which are modified destroyer types armed principally with depth charges and anti-aircraft weapons.

The statement said that July was probably the most successful month in the anti-submarine warfare because Allied imports "have been high, shipping losses moderate and U-boat sinkings heavy."

Before the Sicilian invasion, it related, an armada of warships, troop transports, supply ships and landing craft crossed the Atlantic and Mediterranean waters "with scarcely any interference from U-boats."

### SUBMARINE STATEMENT

WASHINGTON.—The office of war information said that a statement on July anti-submarine operation had been postponed "by agreement of the president and Prime Minister Churchill." G.W.I. did not amplify its announcement.

## SUBSIDY PAYMENTS WILL BE MADE TO CIVILIAN USERS OF LUMBER FOR SPECIFIED USE

OTTAWA.—The prices board announced that subsidy payments will be made to civilian users of lumber for specified essential purposes to maintain retail ceiling prices in lumber, and that the plan will take effect Sept. 1.

The announcement said subsidies will be paid on retail sales to farmers, fishermen, growers of fruits and vegetables, trappers and other individual civilian users who purchase lumber for use in personal trade or occupation or for maintenance and repair purposes.

Subsidized sales do not include lumber for the building of any dwellings or improvements or additions to them, nor sales of lumber to contractors or industrial users. No subsidy will be paid on hardwood or on lumber for sash, doors, mould-

### BOMB STATISTICS

136,000 Tons Dropped On Germany Since War Began

LONDON.—Bombers of the R.A.F. and R.C.A.F. have dropped 136,000 tons of bombs on the whole of Germany since the war began, official air ministry statistics showed.

Of this total, which covered the period from Sept. 3, 1939, to July 31, 1943, more than half was dropped this year. The tonnage dropped by the R.C.A.F. alone was not available.

The Ruhr has taken 68,700 tons of bombs, more than half the total tonnage for Germany. Of that amount 41,700 tons were dropped during the first seven months of 1943.

The R.A.F. and the United States air forces together in the Mediterranean dropped 28,000 tons of bombs from June 10, 1940—the day Italy declared war—until last June 30. Of this total 22,700 tons were unloaded in the first six months of this year.

Since the beginning of the war the Nazis have dropped 71,000 tons on Britain but only 2,000 tons during 1943.

### PLAY MAJOR PART

Women Helping To Handle Mail In North Country

EDMONTON.—Women are playing a major part as mail handlers in the north country, Dominion and provincial postal officials said on return from a 4,500-mile inspection trip through the N.W.T. and the Yukon. Women are helping to handle the mail at McMurtry, Canol project at Fort Norman, Port Nelson and at Dawson City.

The party included: G. Herring, Ottawa, chief superintendent of air and land mail services, Dominion postal department; Major J. B. Corley, district director of postal services, Calgary; G. H. Clarke, district director of postal services, Vancouver, and T. J. Reilly, acting district postal superintendent in Edmonton.

### MUCH BOOTY

About One Thousand Axis Planes Captured In Sicily

ALLIED HEADQUARTERS, North Africa.—The Allied air command said that 990 Axis aircraft had been recovered from captured Sicilian airfields. Included in the booty were 232 Messerschmitt 109's.

The majority of these planes were wrecked when found, but a "surprisingly large number were still serviceable" and were flown to salvage centres, it was said.

### COAL OUTPUT

Six Per Cent. Reduction In The First Six Months Of Year

OTTAWA.—The Dominion bureau of statistics reported Canada's coal mines produced 1,346,851 tons of coal during June, compared with 1,386,452 tons during the corresponding month a year ago. Production for the first six months of this year totalled 3,853,962 tons, a reduction of 6 per cent. from the output during the first half of 1942.

### FIGHT WITH SUB

Crewmen Of A Canadian Freighter Had Exciting Experience

MONTREAL.—The luck of the Irish is still riding with Capt. Ross Sinclair of Toronto, and the crewmen of his freighter. If you don't believe it, here's her record.

During the submarine attacks along the St. Lawrence last summer a Nazi submarine emptied her torpedo tubes at the cargo carrier and missed her bow by a fraction of an inch. Capt. Mac Lamoureux of Montreal, then first officer, saw the torpedo coming and managed to manoeuvre the ship out of range. The torpedo swished harmlessly past to explode on the south shore, three miles away, smashing hundreds of windows and causing plenty of consternation among the villagers.

The submarine dived almost immediately to escape the depth charges of a Canadian corvette but in his haste to get away the commander dived beneath the freighter—but not deep enough. The upper works struck the bottom of the vessel and shipowners believe the sub sank to the bottom after the collision.

### LEAVE BERLIN

Reported That Nazi Government Preparing To Evacuate City

STOCKHOLM.—The Zurich correspondent of the Stockholm newspaper Dagens Nyheter said a traveler from Germany reported preparations under way to evacuate government offices from Berlin. Stockholm had no confirmation from any other sources.

With the non-essential civilian population already evacuating the German capital since Aug. 1, the Zurich correspondent's despatch declared: "A person who arrived from Germany said it had been decided in Berlin the government was going to leave the city. In every ministry preparations are going on. The destination is secret."

### In Command

Admiral Sir Andrew Cunningham of the British Navy, commander-in-chief of the combined Allied operations in the Mediterranean.

### NEW PROJECTILE

Capable Of Piercing Seven Inches Of Armor Plate

LONDON.—A Russian rocket bomb-projectile which may fore-shadow a revolution in airplane firepower was described in a Swedish technical report as capable of piercing seven inches of armor plate although it weighs only about 50 pounds.

Details of the naval weapon, first heard of about a year ago, were given in a translation of a Swedish report on a Soviet Lagg-3 fighter which was released in London by the ministry of aircraft production. The data was believed obtained from a plane which the Finns captured and allowed Swedish technicians to examine.

### BUILD MANY HOUSES

EDMONTON.—Victor T. Goggin of Toronto, managing director of the Wartime Housing Limited, said that completion of the construction program for 17,500 houses across Canada is approaching.

### Canadian Women Services Honor American Waves

Representatives from a number of United Nations women's military services were on hand for the open house anniversary party for the waves in Washington, D.C. Left to right: Pvt. Kathleen M. Fournier (seated) of Windsor, Ont., Canadian Women's Army Corps; D. Loretta Owens, yeoman 3rd class, of Seattle, Wash., U.S.C.G.R.; Sgt. Helen E. Katona, U.S.M.C.R., of Denver, Colo.; Leading Wren E. J. Rodany Moyra, London, Eng.; Sgt. Beth Rowane, Bethune, Sask., Royal Canadian Air Force; Corp. Moira Stone (seated), Bristol, England, Auxiliary Territorial Service; Ethel D. Smith, yeoman 3rd class, U.S.N.R., Des Moines, Iowa; Leading Wren Kathleen McCormack, W.R.C.N.S., Montreal, Quebec; Staff Sgt. Mabel Stenner Carney (seated), W.A.C., Camden, N.J.

### They Place Canada's Army Manpower

Officers whose responsibility is the placing of men in the Canadian Army jobs for which they are best fitted, shown gathered in Ottawa for a conference of district, divisional and command army examiners. Members of the headquarters staff of the Directorate of Personnel Selection are seen above. Seated, left to right, are Brigadier G. Brock Chisholm, M.C., Director-General of Medical Services; Col. W. Line, Director of Personnel Selection; and Lt.-Col. T. P. Sutton, of the D.P.S. Standing, left to right, are Major T. W. L. MacDermot, chief Psychiatrist of the Royal Canadian Army Medical Corps; Lt.-Col. J. M. D. Griffin, R.C.A.M.C.; Lt.-Col. W. R. Wees, D.P.S.; Major N. W. Morton, D.P.S.; and Major H. P. Spaulding, D.P.S.

## CARRYOVER OF CANADIAN WHEAT AT END OF CROP YEAR AT RECORD BREAKING LEVEL

### SEEK QUISLINGS

Look For Frenchmen Who Have Collaborated With Axis

ALGIERS.—The French committee of national liberation created a special commission to begin immediately an investigation of the cases of Frenchmen who collaborated with the Axis.

Not only public officials but private individuals such as lawyers, businessmen, newspapermen and writers, suspected of having worked with the Germans and Italians prior to and after the Allied landings in North Africa, will come under scrutiny.

The members of the commission have not yet been announced.

The communique said the commission would act impartially and would seek only the "truly guilty," distinguishing between those who gave orders and those who merely executed them.

### REDUCE SALES

New Price Board Order Is Issued To Govern Purchases

OTTAWA.—The price board issued an order, effective immediately, making it illegal for a merchant to require a customer to buy additional goods when purchasing other goods which are in short supply. Exceptions are made for any practices of the kind which were established during or before the basic period, Sept. 15 to Oct. 11, 1941, and the order does not apply to goods distributed under provincial direction, such as alcoholic beverages.

The order will not interfere with the sale of articles ordinarily sold in sets.

OTTAWA.—The Dominion bureau of statistics reported the carryover of Canadian wheat at the end of the crop year on July 31 at the record-breaking level of 601,477,184 bushels, against 423,752,337 on the same date last year.

The bureau said new high levels were reached also in the carryover of coarse grains—a reflection of the bumper crop of all grains harvested in 1942.

The carryover of oats was 149,324,136 bushels against 28,607,188 bushels in 1942; barley 69,263,707 against 19,921,462; rye 15,277,088 against 3,353,203 and flaxseed 3,740,121 against 1,027,040.

Of the total of 601,477,184 bushels of Canadian wheat on July 31, some 197,000,000 bushels were held on farms, the bureau reported. At this time last year, only 11,000,000 bushels remained on farms.

Preliminary wheat disposition data indicate that the prairie wheat crop in 1942 was over-estimated to the extent of about 36,000,000 bushels, the downward revisions suggested by this data largely affecting the Saskatchewan crop.

The estimate of prairie production has been 565,000,000 bushels for 1942, of which Saskatchewan was estimated to have contributed 335,000,000 bushels.

The bureau said the Canadian carryover of coarse grains and flaxseed reached a combined total of almost 238,000,000 bushels compared with less than 44,000,000 bushels a year earlier. In the case of oats and barley the carryover this year "greatly exceeded" any other carry-over on record.

Holdings on farms showed major gains in all grains. The farm stocks for July 31, with comparable 1942 figures in brackets follow: Oats 118,404,000 (24,175,000); barley 41,314,000 (5,112,000); rye 6,088,000 (263,000); and flaxseed 394,000 (22,000).

## Canada's Place In Empire Air Transport Plan

TORONTO.—Lt.-Col. George A. Drew, Ontario's premier-designate, told the 24th annual convention of the Canadian Weekly Newspapers Association here that no subject requires franker discussion than that of postwar commercial aviation.

"There is no use attempting to hide the fact that air transport and military air power are two sides of the same coin," Col. Drew said, "and that if the British empire is to maintain its military position, it must maintain a some unified system of air transport."

Speaking over a national network of the CBC in his first public address since the Aug. 4 Ontario election, the Progressive Conservative leader said that unless Canada forms part of some "empire air transport system" there is not the slightest chance of her being able to build aircraft needed for her services.

"Geography has given us opportunities in air transport unequalled by any other nation," Col. Drew said. "We can only develop those opportunities as they should be developed with an empire air partnership."

"I think that Canada is entering a period of growing population and power. It is not beyond the realm of possibility that in the not too distant future the most powerful economic unit in the empire may be Canada itself," he said.

Roy F. MacLean, publisher of the Kelowna (B.C.) Courier and president of the Canadian Weekly Newspapers Association meeting, told the opening session no national effort could succeed without the aid of rural Canada enlisted through the medium of the weekly press.

"The Dominion's Victory Loan objectives would never have been achieved without the support of the weekly newspapers," he said. "They are the nation's morale-builders... not so loud as the daily press, but more influential."

### MALTA DEFENCE

VALETTA, Malta.—American anti-aircraft gunners now are helping man Malta's formidable defences, it was disclosed in the latest evidence of Allied co-operation.

## Time Bombs

"We're a great people," said a country philosopher, "but we don't always work at it."

The business of the future will make men its chief business. Self-discipline is the armor that's invincible to Hitler's secret weapon. He has banked everything on our inability to control ourselves.

The whisper of conscience, lived out loud, must again become the voice of the nation.

Great emergencies give men their greatest opportunities.

Help your country to victory—enlist now!

## NOTES AND COMMENTS

## Fish and Game Warden Subject of Debate

It appears we started something last week when we published an interview with a local sportsman who agitated for a fish and game warden to be permanently stationed in the Pass. Early Friday morning we were met by local sportsmen who were in accord with his remarks and voiced a few suggested improvements of their own. Mr. Thomas Yates, fish warden located at Pincher Creek, lost no time in sending in a list of rivers and lakes which had been stocked with young fish the week previously. A letter "to the editor" appears elsewhere in this issue dealing with the subject and on Wednesday morning a sportsman purchased two Journals to be sent to the Fish and Game Commissioner at Edmonton and to Joe Cardinal, former warden here till a year and a half ago. In conversation with a number of sportsmen we are of the opinion that their agitation for a fish and game warden in the Pass is based on good grounds. The door has been pushed open and a few of the fish and game authorities seem to be looking in this direction. The columns of The Journal are open to sportsmen agitating for a fish and game warden to state their arguments. Let them take advantage of the opportunity to further their case.

## The Arena and Repairs

Next month the Coleman Sports Association committee will meet and give serious study towards making improvements on the arena. This is a problem which requires serious study. As we all know several thousands of dollars are required to put the building back into shape. The question arises: should all this money be spent on a building that is obviously built in a bad location? Dust from the tippie and coke ovens make it impossible for ice makers to secure clean ice. Curlers for years past have agitated that the arena should be moved to another location.

The association is new and we have grounds for believing that they have in mind long range plans for things to come in the local sports world. Wouldn't it be nice if one of their long range plans was to see erected an arena in the now defunct tourist park, which is free from the dust nuisance? In a case such as that repairs to the present arena would be of a temporary nature.

## Canada's War Effort

Is Canada's war effort getting too big for it, or is its manpower policy getting so tangled up that the war effort is beginning to suffer? For a country of a few million people we humbly believe we have done a magnificent job in this man's war and will continue to do so till victory has been achieved. However, the manpower problem has reached the point where the war effort is being effected. It has been officially announced that unless more men enlist for air crew in the RCAF, at least one-third of Canada's most important and brilliant contribution, the British Commonwealth Air Training Plan will be forced to close down. In the field of labor we have men of the armed forces receiving three to six months leave of absence from military training to come back to the mines. We have labor being taken from the shipyards and airplane factories, both vital in the war effort, to help alleviate the coal shortage. Again we have youngsters remaining out of school for a month or more to help farmers harvest the crop, aided by additional men from the armed forces.

There is a limit to our manpower resources. The armed forces want men. Industry and agriculture want men. Present indications seem to reveal that neither knows when they have reached the point that to take more will hurt the other. Canada's war effort and manpower resources should be thoroughly scrutinized to see whether the war effort has reached its peak or the manpower problem is at fault.

## What Manner of Men Are They?

The spotlight of publicity during the past two weeks in home affairs has been pointing with much regularity at Quebec. Two weeks ago we had a candidate elected to the federal house with a platform utterly opposed to aiding Canada's war effort. He won his constituency with a large majority. This week we have two French papers publishing a "rumor" which has Prime Minister Churchill stating that the war would be over within six months. The editors of these two papers must have known that such a report would cause untold damage throughout the Allied war with a reduced war effort, lower morale among some should the war not finish in six months and countless other complications. Yet they did publish this report knowing these facts. As was expected, Churchill vehemently denied having made such a statement. What manner of men are they?

## Chinese War Relief Fund

A campaign is in progress at the present time throughout Canada to raise \$1,000,000 for the Chinese War Relief Fund. The cause of the Chinese is just as worthy as the Greek and Russian campaigns before it. For six long and weary years the Chinese have fought almost single handed the Jap invaders and today keep almost 1,000,000 Japs immobilized in China, making the Allied fight against Japan that

much easier. Her people have suffered starvation and torture at the hands of the Japs. A million dollars means a great deal of help to the Chinese people. Donations can be sent direct to The Calgary Herald, where they will be acknowledged through its columns, or can be sent to the Royal Bank of Canada at Blairmore.

Secret of Success  
(The Printed Word)

Mrs. Wade is a successful historian. For over thirty years she has been writing the history of the Big Chute—and getting this history published too. Another feature that puts her ahead of some historians is that a good many people read every word she writes. And they like to read her history: this sends her away out in front of many more erudite historians, whom people read only because they think they should.

Around Big Chute, which is not big at all, but only a very small village, nobody thinks of Mrs. Wade as being an historian. They take her for granted as a wife and mother who makes good potato pies. It is well known of course that once a week she turns in a handful of "personals" that appear in the newspaper of the nearby town under the heading of 'Big Chute News'. Everybody in the village, who is old enough to read and young enough to see, gives close attention to the half-column of 'Big Chute News' sometime during the week, although they don't all subscribe to the paper, copies of which circulate on fairly definite schedules from one house to another.

In Canada there are over five thousand historians like Mrs. Wade, although not all so good. They are district correspondents to the weekly and smaller daily newspapers. Unknown outside their districts and not recognized in their districts as historians, these people have what every ambitious author longs for—an absolutely loyal following of readers. As a class the historians of the "personals" stand in the very first rank, according to surveys of who reads what in the newspapers. They have the secret of literary success: they write about their readers.

## Why the Fuhrer Fumed

When Hitler visited one of the occupied countries he is reported to have visited the police headquarters of one of the larger cities. Previous to his departure a tactical Nazi official sent the police six different photographs of Adolf, trusting that they would be displayed during Hitler's visit.

When the Fuhrer arrived, however, none of the portraits was visible so the Nazi undulating took the police chief aside and asked, "Did you get the six pictures? I sent you?"

The police official pondered a moment, then replied: "Why, yes, I remember. You'll be glad to know that we've caught five of them already!"

## Letter to the Editor

(Continued from Page 1)

I also think that a few changes in regard to open and closed areas would be in order. I believe that the open area for elk should be enlarged to take in Racehorse, Dutch

and Hidden creek areas, and also that the restriction on the number of points required to make a legal head should be done away with, as the elk are getting too plentiful for the range and are driving the deer out of this section, as they did on the Carbondale and adjacent areas. In other sections deer have greatly increased.

I believe deer should be closed for a year or so in a few small areas, but not unless a warden was on the job to see that it was closed, and more so in the closed season than in the hunting season.

Moose have increased greatly in the past twenty years. We have more moose now than we ever had. I believe we could have a short open season in the near future, and we could enjoy a good moose roast without having to depend on some poacher giving us a piece. Moose have not increased simply because there has been no open season. The

range has changed. A lot of timber has been either logged over or fire-killed, and willows have replaced the heavy timber, making it ideal moose range.

By all means, advocate for a warden—two or more, if we can get them. Even the fellows who shelled out hard-earned greenbacks when Joe Cardinal was on the job will admit that the game increased greatly.

Let's not forget that we have as fine a game country at our door as there is to be had anywhere, but it needs our support to keep it so. We will have to get organized, or it will be no more than a memory.

Let's hear from you hunters and fishermen. Let's have your views on the matter. Let's start a fish and game association throughout the Pass for the preservation of fish and game.

J. R. Kerr.

## Support The Chinese War Relief Fund

Canada has undertaken the obligation of raising \$1,000,000 by popular subscription from her citizens.

Aid her with a contribution.

## What China Is Doing For Us

CHINA has killed or permanently incapacitated 1,200,000 Japanese soldiers, who, otherwise, would have been thrown into the battle against us.

CHINA is engaging 1,000,000 Japanese soldiers on her own fronts. Their release for service elsewhere would vitally affect the position of the United Nations, and conceivably, turn the tide of war.

CHINA offers the United Nations the most accessible bases for the offensive against Japan. She protects Russia's backdoor. Her troops, under General Stilwell, have joined the United Nations in the defense of India.

CHINA is a paramount factor in shortening the war. A long war will mean a ghastly loss of life, a staggering debt burden and a drastic dislocation of our free economy and way of life.

## Soldiers' Letters

A letter was received by The Journal on Tuesday morning from Jamaica and written by John Sikora, an East Coleman boy. It reads:

Dear Sirs: I receive local news clippings from the Coleman Journal regularly and must say they are very enlightening on home town doings. It being hot down here, one gets "black fever" (laziness), but we are in high spirits and don't think the war will last long once we get into action.—Sikora, J.

Editor's Note: The Journal office is allowed by the postmaster general to send papers to boys serving overseas. This permission is not allowed civilians. Special Journal rates prevail for men in the armed forces.

### LOCAL MEN BEREAVED

The death occurred at Nelson, B. C., on Tuesday evening of Albert Derbyshire, 49, of Crawford Bay, brother of Messrs. George and Jack Derbyshire. Deceased formerly resided at Blairmore. Mr. and Mrs. George Derbyshire left Wednesday morning for Crawford Bay to attend the funeral.

### TAKE MOVIES OF WORKERS AT INTERNATIONAL

A group of photographers, representing a movie company, spent approximately 2 hours on Monday evening taking scenes of miners at International tipple. The coke ovens were also photographed. It is said that the movies will appear at the local theatre in due course.

### CATCHES 4½-LB RAINBOW

Fishing near Lundbreck on Tuesday evening Harry H. Gardner had the thrill of hooking and landing a 4½-pound rainbow trout. His prize put up quite a fight before being subdued. Art Fraser was an interested spectator.

### Common Sense and Commissars (The Printel Word)

Officially the government is against waste. There are even efficiency experts in the civil service who are charged with the duty of suggesting to private business economies in operation and methods of "cutting out the frills," thus saving manpower for more essential uses. Statistics of results are not available, but presumably the ideal will be attained when business has cut out sufficient of its own peculiar frills so that it can handle without inconvenience all the new frills of tax deductions, unemployment insurance accounting, statistical reports, ration coupons and other documents that are contributing so greatly to our ultimate victory.

Some government departments have by now become so impressed by the efficiency campaign that they will listen to suggestions coming from business. The suggestions are rarely accepted, but from time to time an official will offer a counter-suggestion as a substitute.

For example, there is a chain of food stores—let us say in Winnipeg, where it isn't—that employs a full time mechanic to keep in order such machinery as scales, cash registers, meat slicers and coffee mills, with which all their stores are equipped. It is an important job, particularly as new machines are not obtainable, and the mechanic uses a light car to pick up the machines, carrying them on the seat beside him, so as to avoid jarring the delicate mechanism.

When the car needed new tires recently, the manager of the chain explained the circumstances carefully to the appropriate official, and gave him assurance that the car was used only for this work, and was kept in the company garage at nights, and was necessary for proper conduct of his business, the machines in question being too heavy and bulky to be transported across town by street-car.

The official was sympathetic, but rules are rules. The car was officially a pleasure car and therefore ineligible for tires. However, he had alternative suggestion. Let the company buy their mechanic a light delivery truck, and it would be eligible for all the tires and

gasoline they wanted.

The suggestion was accepted and the mechanic is driving the truck when he goes to pick up a scale. He still has to carry the scale on the seat and the extra weight of the truck means a little more wear on tires and a little for the light car; but the rules of higher gasoline consumption than the tire controller stand unbroken.

People shop where they are invited—that's why it pays to advertise.

### Right Proportion

The night the Marines landed in the Solomons, a Marine sergeant in a San Francisco cafe was praising the corps to the skies. An Army captain finally interrupted. "Don't forget," he said, "that when a Marine goes into battle there are 10 soldiers on one side of him and 10 sailors on the other."

The Marine raised himself to his full six feet one and came to attention. "Sir," he retorted, "that's the proper proportion" — Yank

After all, the field of battle possesses many advantages over the drawing room. There at least is no room for pretention over the ceremony, no shaking of hands or rubbing of noses which make one doubt your sincerity, but hearty as well as hard hand-play. It at least exhibits one of the faces of humanity, the former only a mask.

Did You Know That— Because of its high acid content rhubarb may be canned without sugar?

## Now..YOU can be a Fighting Airman in Double-Quick Time

### The R.C.A.F. wants MORE Able-Bodied Men for Aircrew

THERE'S a place actually waiting for you in the gallant band now flying and fighting in R.C.A.F. planes on many different fronts.

More men are urgently needed to increase the attack—to bomb and blast the enemy into unconditional surrender. So, whatever work you are now doing, don't let adventure and glory pass you by. It's your great chance. A job, even in a war factory, is no longer as essential as fighting in the air. This is a call to every young Canadian who can make the grade.

### Planes and Schools are Ready to Train You Quickly

You will be in Air Force uniform right away. No more delay getting into aircrew. Basic training begins at once. Skilled instructors are waiting. Fast planes are waiting. If you are physically fit, mentally alert, over 17½ and not yet 35, you are eligible. You do not require a High School education.

**Aircrew Needed Now for Immediate Training as**  
**PILOTS**  
**NAVIGATORS**  
**BOMBERS**  
**AIR GUNNERS**  
**WIRELESS OPERATORS (AIR GUNNERS)**

## ROYAL CANADIAN AIR FORCE

Recruiting Centres are located in the principal cities of Canada. Mobile recruiting units visit smaller centres regularly.

AC-3W

## How long is 3 weeks, Ivan?

• Hitler boasted he would smash Russia in three weeks . . . Ivan's courage, resourcefulness and fighting skill have already spun those three weeks into a third year.

What is three weeks . . . what is Time itself to Ivan but a succession of minutes, each one marked by the fall of a Nazi soldier.

We have helped Ivan destroy Hitler's time-table by sending planes, tanks, guns, shells, food. It is a proud thing to share even a little in Russia's triumph to this hour.

We who make high-proof alcohol for the smokeless powder in Ivan's high explosives also have a special way of measuring Time. In our plants, wholly converted to war production, we mark the passing of each hour by the thousands of gallons of high-proof alcohol flowing from our giant stills. Three weeks, three months, three years . . . it will go on flowing until the last Axis soldier has laid down either his body or his arms . . . in unconditional surrender!

## THE HOUSE OF SEAGRAM

ALCOHOL FOR WAR IS USED IN SYNTHETIC RUBBER, MEDICINES, SHATTERPROOF GLASS AND OTHER PRODUCTS. EVERY SEAGRAM PLANT IN CANADA AND THE UNITED STATES IS ENGAGED 100% IN THE PRODUCTION OF HIGH-PROOF ALCOHOL FOR WAR.

WORLD HAPPENINGS  
BRIEFLY TOLD

Money in circulation in the United States hit a new peak of \$17,946,423-125 on July 31, or \$131.31 for every person in the country.

Final steps in the creation of a single national telegraph system for the United States were taken as stockholders of Western Union and Postal Telegraph voted to merge the communication agencies.

Lord Woolton, British food minister, announced that he had bought the world's whole non-axis tea supply for next year, estimated at 212,000 tons.

Floods have taken 6,000 lives in the area of Ajmer, 220 miles southwest of New Delhi in northern India, it was announced officially.

M. J. Warner of Edmonton was elected president of the Canadian Pharmaceutical Association at the annual meeting in Toronto recently.

An increase of 29,067 in the number of Canadian workers in May over April was reported by the Dominion bureau of statistics, with the 13,689 firms co-operating in the latest survey.

The Italians, in their coal shortage, are going to try to recover 40,000 tons lying at the bottom of Trieste harbor—wastage of years from the re-cooling of ocean-going ships.

## Ducks Are Plentiful

More Ducks Than Last Year In Western Canada

It's too bad the duck hunter's supply of ammunition is going to be low this autumn. Because the same can't be said for the ducks themselves. A report by Ducks Unlimited stated that in 331 of 650 districts in western Canada there are more ducks than last year; in 65 the population is the same, and in only 34 it is less. Mallards have increased most in numbers, with pintails, teal, redheads, widgeons following close behind.

## Easy-On, Easy-Off

4437

By ANNE ADAMS

Busy, full of pep and patriotism? Then here's that flatteringly out button-front you'll whip up and off twist crowding activities. Anne Adams Pattern 4437 is no trouble to make. Follow the clear sewing guide that's included. Use a crisp chambray or a washable rayon.

Pattern 4437 is available only in women's sizes 34, 36, 38, 40, 42, 44, 46 and 48. Size 36 requires 3½ yards 35-inch fabric.

Send twenty cents (20c) in coins (stamps cannot be accepted) for this Anne Adams pattern. Write plainly Size, Name, Address and Style Number and send orders to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg, Man. "Because of the slowness of the mails delivery of our patterns may take a few days longer than usual."

Working in Anchole Valley near Beunthorpe, England, a mechanical excavator unearthed from an old river bed a boat 2,800 years old, 24 feet long, and hollowed out from the trunk of an oak tree.

Skagway, Alaska, now famed for its beautiful gardens, was the chief port of entry during the Klondike gold rush.

## SUNDAY SCHOOL LESSON

AUGUST 22

## GOD GIVES LAWS FOR HIS PEOPLE

Golden text: Thou shalt love the Lord thy God with all thy heart, and with all thy soul, and with all thy strength, and with all thy mind; and thy neighbor as thyself. Luke 10:27. Lesson: Exodus 19-24; Deuteronomy 1:1-18; Galatians 3:23-28; 5:13, 14.

Devotional reading: Psalm 19:7-14.

## Explanations and Comments

Ancient Laws Regulating the Administration of Justice, Exodus 23:1-9. Verse one is like the Ninth Commandment. Thou shalt not take up a false report; put not thy hand with the wicked to be an unrighteous witness: these are other ways of saying Thou shalt not bear false witness. With the second direction of verse one The One Volume Commentary quotes the Arabic proverb: "In wickedness the listener is the ally of the speaker."

Do not fear the crowd in doing evil. Do not bear witness in an unjust cause that is favored by the multitude. Neither shalt thou favor a poor man in his cause, verse 3, and thou shalt not wrest the justice due to thy poor in his cause, verse 3, teach that judgment is to be strictly just, no favor is to be shown a person either because he is poor or because he is rich. "It is an admirable caution. Men there are who would scorn the opposite injustice, and from whom no rich man could buy a wrongful decision with gold or favor, but who are habitually unjust, because they load the other scale. The beam ought to hang straight, when justice is concerned."

Even an enemy must be treated justly. You must bring back to your enemy the ox that you find straying off, and if you find the ass of one who hates you lying down unable to rise because of the burden on its back, you must surely free it. Recall Christ's words: Ye have heard that it was said, Thou shalt love thy neighbor and hate thine enemy; but I say unto you, Love your enemies, do good to them that hate you, Mt. 5:43, 44.

"The old law never can be abolished. It is one of the very laws which Jesus Christ came to fulfill. Who can do it? To help the cause of a friend would be a pleasure, but to lift up the burden from the back of the ass of an enemy tears us in pieces and tests our quality. Nor can we do it in a mere law-keeping spirit. We know that to keep this law we must be above the law; grace must have done its redeeming and inspiring ministry in our hearts before we can keep this law in the perfection of its meaning. We have all opportunities of doing honor to this law." (Joseph Parker).

## A SLIGHT DELAY

A Christmas card came in the mail to Paul Kleiman of Philadelphia, recently, postmarked Dec. 10, 1910. The envelope bore a freshly stamped postal notice saying: "In order to avoid delay in delivery, notify sender of your post office district."

## Wartime Waiters Learn To "Wait"

Enlistment in the armed services has taken many experienced waiters from Canadian National Railways dining car duty. They are replaced by younger men not subject to immediate call. Veteran dining car stewards instruct the newcomers in the fine points of providing the courteous service for which Canadian National meal cars are noted. Above, Steward William Hector, veteran in Canadian National service, gives a demonstration to F. Baianoff (left), 19 years old, R. Karpiuk (third from left), 19, and Joe Lemuk (right), 18. Looking on is F. Paul, an old-timer in dining car service, who is standing in the centre.

## Air Sickness

Says Illness In The Air Can Be Conquered

Air sickness—this plague of the unhappy victim and source of amusement to the unaffected—is curable, Dr. G. R. Wendt, who has made a 10-year study of the ailment asserts in an article for the magazine "Flying".

Conditioning is the key to both prevention and cure of air sickness, Dr. Wendt says in setting forth a few rules for conquering nausea, which has proved a serious problem in the vast pilot training program of the armed services.

Air sickness is attributed to the delicate mechanism of the inner ear, but psychological factors play an important part, too, Wendt states. Most potent of these factors are association with others suffering from nausea, memory of previous attacks and expectation of illness.

Students should be conditioned gradually to movements of flight and taught not to anticipate illness.

"And remember," Dr. Wendt says, "every trip made without sickness increases tolerance for motion—while every trip on which sickness is experienced makes the person more susceptible."

"Crocodile tears" is used as a term of hypocrisy because the reptile cries when it fills its mouth with food.

## SAFE MILK FOR BRITAIN

There is no serious difficulty in the medical profession on the question of pasteurization, the British minister of food was told by a high representative of the British Medical Association, when a delegation urged complete pasteurization of milk in the United Kingdom. The distinguished deputation which waited on the minister included representatives of the National Association for the Prevention of Tuberculosis, the British Paediatric Association, the People's League for Health, and other bodies.

The minister, in reply, said the Government had an obligation to assure a safe milk supply, or otherwise to instruct the people how they might obtain a reasonable security in milk consumption. He said he was investigating the situation.

Prof. L. P. Garrod informed the minister that tuberculosis was deplorably common among British dairy cattle and that one-third of the deaths from tuberculosis in children under 5 years of age were due to the bovine organism. This meant 2,000 deaths annually, and there was additionally a large percentage of invalidism and crippling.

Another disease of the cow transmitted to man was contagious abortion (which causes undulant fever in humans), and then there were the ordinary infections which might be transmitted, usually by contamination of the milk by the milker. All bacteria concerned in these cases could be destroyed by moderate heat for a short time. Pasteurization did not alter the flavor of milk.

Dr. Alan Moncrieff, said child specialists were concerned about the possibilities of infections of the alimentary tract due to dangerous milk. Only pasteurization gave the guarantee of safety.

Dr. C. O. Hawthorne said the public was misled by such terms as "clean" or "pure" milk, or even "accredited" milk. He preferred the term "safe milk," meaning pasteurized, the only guarantee against infection.

## OLD SCHOOL BOOK

A 1621 edition of the "Arithmetic" of Diophantus, author of the earliest known work on Algebra, has been presented to the University of New Hampshire by Dean Hermon L. Slibin of the university's graduate school.

Blue eyes in a white cat often indicate that the cat has defective hearing.

## Has New Job

Fighter Pilot Is New Governor Of Lampedusa

The soil is poor, but we hope to get every available acre under seed this autumn. This produce, added to the fish and supplies from Linoia, which is much more fertile, should make quite a good living for the people of the island.

I have reopened the schools which were closed by the Italians months ago, but we are in need of non-Fascist school books and school-room material, such as pencils.

I am doing my best for the local people, and particularly the children for whom I have arranged a daily distribution of milk and orange juice. They have had a very thin time of it, and food and sanitation are my two biggest problems in local administration. — Wing Commander John D. Bisbee, D.F.C., governor of Lampedusa.

## Learned How

American Soldiers In Britain Stumped By An Egg Cup

A. G. Street, farmer and author, who took part recently in the BBC trans-Atlantic series "Answering You," told two amusing anecdotes. The first related to that wartime rarity, the egg. He said that only one thing seemed to have puzzled U.S.A. soldiers whom he and his wife had entertained in their farmhouse in Britain. There were no difficulties with the language at all. The great problem arose when they served the Americans with an egg in an egg-cup. Not, one gathers, because an egg was an oddity as such—only that particular way of serving it. That "absolutely flopped them out." They looked at it and asked, "Well, say what do we do?" Street said, "Why, knock the top off." They said, "Oh yes—and then dig in?" And they dug in, with a spoon.—BBC Service.

### Synthetic Beefsteak

Food Product of High Protein Content For U.S. Army

Synthetic beefsteak is one of several meat and other food extenders produced from a high-protein type of yeast that Anheuser-Busch Inc. is delivering to the army and the lend-lease administration, a company official announced.

Cost of the synthetic beefsteak is only one-fifth of natural beef and will satisfy most palates. "But to call these products substitutes for steaks is being a bit flowery," declared Arthur Weber, head of the company's yeast department. "Our product has the same amount of nutrition, however, and can be compared to the steak as far as value is concerned."

It is predicted that production of the new substances will be continued after the war with an eye to putting cheap, vitamin-filled food on post-war tables.

In making the synthetic steak, yeast is mixed with water and molasses. This mixture is treated with ammonia which converts the yeast to protein. During the process air is stirred into the substance and 12 hours later the ersatz meat is the result.

Dr. Carl C. Lindegren perfected the process at Washington University, St. Louis, while working on an Anheuser-Busch fellowship.

### New Discovery

Make Water-Proof Cloth In Britain Without Use Of Rubber

Discovery of a method of water-proofing cloth without the use of rubber or other materials was announced at Manchester, Eng., and the "self-sealing" fabric now is being extensively supplied to the government for war purposes. None has yet reached the civilian market, but a big future is predicted for it.

The method was evolved by Dr. F. T. Price of the British Cotton Industry Research Association's Shirley Institute. The self-sealing cloth resulted from the realization that if the fibre of cotton could seal with moisture, it would block up the interstices and make fabric water-holding without waterproofing.

### WILL TRAIN MEN

The British government proposes to give special training to 200,000 men in the first three years after the war to meet the shortage of labor in the building industry. It was announced at a conference organized by the Building Industries National Council.

### "MIDDLE-AGE" WOMEN

## THE HUMAN COMEDY

Adapted from the Metro-Goldwyn-Mayer Picture  
By BEATRICE CAMMER

### CHAPTER FOUR

The streets were wet and glistening with rain. Bess had been shopping with Marcus' girl, Mary Arena. They walked along, happy, under their cellophane umbrellas, enjoying the light shower. In front of a drug-store three soldiers, respectively betraying humor, good nature and mischief in their twinkling eyes, halted them.

Then they came up and bowed worshipfully before the girls. Bess giggled and so did Mary.

One of the fellows doffed his cap and spoke. "My ladies, we of the great Democratic army, your humble servants, the soldiers, here today and we hope, here tomorrow, thank you for your beautiful faces—in times of dryness no less than in times of rain. May I present my comrades and your devoted admirers." He indicated the tall, rangy fellow, "This is Texan. He is from New Jersey." Now the next one, "This is Horse. He is from Texas."

The third one stepped up. "I am Fat. I am from Hungary. Now, more than anything else I hunger for companionship. You see, it feels better having girls near. It smells better than the stink of the trench."

Bess laughed. "We were going to go to the movies with them." "To the Kinema," Fat intoned automatically. Ah, consider with generous hearts our humble fellows, for we are of one family, the human, and except for war we might never meet. What do you say? To the movie with us?"

"Is he crazy?" Mary whispered to Bess. "No, Mary, he's just lonely. Let's go to the movies with them." A moment later, they were all seated in the Kinema. It was loving and warm, sisterly and brotherly. They were all cheered at the newsreels of Churchill and Roosevelt. They wept and laughed at the romantic movie. Later, the boys sent telegrams to their folks and girls and read them to Bess and Mary.

Finally, it was time for farewells. The moment was hasty and full of innocence. Fat kissed Bess and Mary. The Horse shouted, "Well, what about us? What about me and Texan? We're somebody too. We're in the army too."

So the girls kissed them and then the three boys leaped and frolicked down the street until they were out of sight.

If Homer had seen them all he would have known that there was another kind of love too, the love of comradeship among strangers, the warmth of the human towards those who are lonely and far from home.

The next morning Homer slept later than usual. It was Saturday. No school. The clock said nine-thirty when he got to the breakfast table. From the empty lot outside came sounds of Ulysses and the other kids having a football game. Homer smiled paternally. Then he listened to his mother. "See, I didn't want to sleep this late Ma. Why didn't you call me?"

His eyes crinkled with love. "You're working hard Homer. You must rest."

"I'm not working so hard. Gee Ma, I wish you wouldn't worry about me. You know I'd sort of like to feel in some way that maybe I could take Marcus' place a little. Let me do the worrying for you. I'll do it fine."

All that day he worked harder than that very day he worked harder than every day he worked harder than the nice glow that evening when the policeman stuck his head in the telephone office. "Hey Homer, your little brother Ulysses is lost outside. You better come and get him."

There was a crowd surrounding little Ulysses. The child's face was streaming with tears. The most awful thing had happened. He had been staring in a store window at a Mechanical Man. The man, disgusted with only an audience of one had suddenly made a terrible face and a clanging gesture. Ulysses had run as if goblins were after him, shrieking and terrified. Then a crowd had come and that was even worse.

Homer knelt beside him. "What's the matter? What are you crying about? He understood. 'Ah you're just scared that's all.' Ulysses replied in wonder. "Scared? Am I scared?" Homer swooped him up on the handlebars of his bike. "There's nothing to be afraid of. You don't have to be afraid any more."

A big smile broke over the child's face. Life was opening up for him. This was a new experience. He hugged himself and repeated the delicious words. "I'm afraid. I'm afraid."

Homer's breast swelled. He felt quite important and grownup, rescuing Ulysses. He was doing the worrying for Ma, taking Marcus'

place. The feeling mounted in him, soared. He couldn't know it but it was his father's spirit that so moved him, preparing him for the future. Way up on high, Matthew Macaulay was watching his eldest son Marcus leaving camp. He was speaking soft words of prophecy.

"And now the orders have come for these American boys... kids from big cities and from little towns, from farms and from offices, from rich families and from poor families, kids brilliant and swift in spirit and kids slow and steady. These are the Americans. They are, I'm afraid, but they have accepted the necessity to dismiss their fear and if it so happens to die. Ah Marcus, you will be joining me perhaps."

The troop train which Marcus saw was moving through the night. One of the soldiers was putting on a bit of horsplay. At the further end of the car a trio sang some folk songs.

Marcus and his pal Tobey sat together. Tobey's round face was solemn. "You know Marcus I feel pretty lucky. If it hadn't been for this war I wouldn't have run into you." He moistened his lips. "Tell me Marcus are you going to care much if you're killed?"

Marcus' face shadowed with thought. "Yes Tobey I'll care a lot. There are my folks back home, the old neighborhood, the kids that used to be in my classes. Those are all the things I want to go back to."

Tobey had been listening intently. He spoke with matter-of-factness, not sadness. "Well, being an orphan, I haven't got a family to go back to. Or a girl waiting for me like Mary." He turned half around in his seat. "But you know it's a funny thing, Marcus. I almost feel that Ithaca's my home town too. He paused for a moment, then: "If we get through all right will you take me back with you, show me all the places you knew?"

An inner lamp seemed to light up Marcus' face. "Yeah. I want to do that Tobey, and I want you to meet my folks. Oh, we're poor, always have been. My father was a great man, not a success. We didn't even have any more money than we needed. And you know what? I think you're going to be crazy about my sister Bess." He reached in his pocket and pulled out a snapshot.

"Here. Take her picture. It's yours to keep—the way I keep Mary's in my pocket."

Tobey looked at the tiny photograph with reverence. "Bess sure is a beautiful girl, Marcus. I don't know if a guy can fall in love with a girl without meeting her but I feel like I'm in love with Bess already."

"Maybe she'll feel the same way. And if you love each other what's to stop you from getting married?" As if in answer Tobey quietly became a prayer. His face was raised, his hands clasped as he said: "Just get me to Ithaca if you can. Any thing you say but let me get home. Protect everybody, keep them from pain, send the homeless to their homes, get me to Ithaca. Amen."

"Amen," Marcus echoed. His eyes were shiny. "That's a good prayer, Tobey. I hope it's answered." He opened his bag and drew out writing pad and pencil. "Think I'll get a letter off home. I'm right in the mood for it I guess."

(Tobey and Marcus have discussed an after-the-war future. But now they are heading for battle. Will they get back to Ithaca, to their loved ones, to build the Peace? Don't miss the next exciting installment.)

### Heroes Of Malta

Little Island Gained Revenge For Her Long Suffering

Tiny Malta, on the receiving end of savage Axis attacks for more than two years, served as the "brain" for the Allied invasion of Sicily to gain revenge for her months of suffering. Gen. Dwight D. Eisenhower disclosed. Gen. Eisenhower established his command post for the operation in the limestone caves of the island.

It was the second time that caves have served as headquarters for Allied offensives. Gen. Eisenhower's headquarters in the attack on North Africa last November were in the tunnels of the fortress of Gibraltar.

The tall, sandy-haired commander-in-chief of the Allied forces in Africa paid tribute to Malta and the Maltese. "The epic of Malta is a symbolic experience of the United Nations in this war," he said. "Malta has passed successfully through the stages of woe, unpreparedness, tenacious endurance, intensive preparation and the initiation of a fierce offensive. For this inspiring example, the United Nations will be forever indebted to Field Marshal Lord Gort and the fighting services under his command and to every citizen for the heroic stand."

Gen. Eisenhower also praised the work of the Malta air force saying that except "for the Malta air force and for the constructive accomplishments of the whole Malta command during the past year the current attack could scarcely have been classed as a feasible one."

The commander and his staff went to Malta four days before the beginning of the offensive to direct the attack on Sicily. The general's aide said sand flies did several of the general's staff low with the fever which they waited for the invasion to begin.

One of the most tense moments of the campaign came when the windmills on the island rapidly gained speed a short time before H-hour. Farm-bred Gen. Eisenhower was first to realize that their rising speed meant many heavy seas which might imperil the whole invasion.

It was a coincidence that a similar situation gave the most cause for worry at Gibraltar a few hours before, the North African landings. Rough seas along the "iron coast" of Morocco subsided only a few hours before the Americans landed.

### Destroy Locomotives

R.A.F. And Canadian Fighters Knock Out 100 In July

R.A.F. and Canadian fighters and fighter bombers knocked out about 100 moving locomotives in attacks on Axis railway communications in occupied countries during July, the air ministry announced.

The figure does not include trains damaged or destroyed in railway terminals, the announcement said. Pilots participating in the raids were under strict orders not to attack civilian passenger trains, the ministry added.

### Mammoth Plant

Giant Planes To Be Built In New Plant In Chicago

The mammoth plant of Douglas Aircraft has been dedicated at Chicago, only 10 months after ground was broken for the main manufacturing plant. Here the largest planes in full scale production in the nation, the four-engined C-54 Sky-masters, which are the cargo version of the DC-4 developed for the commercial airlines, are to be turned out in quantity.

These light metal giants will be hatched from a nest of wood, the largest wooden structure in the world. Realizing the critical demands for steel for other purposes, plane engineers and the Material Command of the Army Air Forces utilized enough lumber in its construction to build 4,500 good-sized homes. Even downspouts have been made of fibre, water and process lines of asbestos and plastic pipe, siding of cement and asbestos, and huge trusses and columns of plain and laminated wood.

Enough critical material has thus been saved to make 3,000 medium tanks, 4,200 army trucks, 2,400,000 rifles, 100,000 20-mm. aircraft shells and 3,000,000 75-mm. armor-piercing shells. From the airport of this ingeniously fabricated plant, which includes runways totaling twenty-five miles in length, will fly Sky-masters each capable of carrying 15 tons of arms and equipment or 50 fully equipped and armed soldiers.—New York Times.

### Fast Travel

Editor Speculates On Rapid Transit When The War Is Over

One can leave Lethbridge in the evening and be in Montreal by T.C.A. plane the next morning.

One can leave Montreal in the morning and be in London that evening. A T.C.A. plane made a record crossing from Montreal to London in 12 hours 28 minutes.

Which means that the time is here when a traveller could leave Lethbridge Friday evening, be in London on Saturday night, spend the weekend there and be back on Tuesday.

That's just a hint of the world to come when this war is over and commercial flying comes into its own. No wonder there is more talk about civil airlines and their control after the war than about any single post-war subject, not even excepting social security.—Lethbridge Herald.

### Protective Overalls

To Be Supplied To Entire A.R.P. Personnel In Canada

Canada's entire A.R.P. personnel will be supplied with protective overalls as soon as finances and the supply of necessary material will allow. Brig. Alexander Ross, Federal A.R.P. director, said in an interview at Vancouver. "We have already started the issue of these overalls but unfortunately have not got enough to go around," said Gen. Ross. The problem of getting necessary materials was greater than financing the project.

### TRIPS FOR TEACHERS

A proposal that every British school teacher visit at least one empire country after the war was made by Capt. L. D. Gamman, M.P., in a recent speech. And to acquaint other M.P.'s with the empire, Capt. Gamman suggested that they be provided with a free travelling pass to any part of the empire they wished to visit.

Oxygen is the commonest of all elements on earth. 2529

### Propose A Unified Empire Air Policy

Expressing fear that Britain would not be prepared to compete with the United States in air transport for several years after the war, the British joint air transport committee proposed that the government adopt a unified empire air policy for discussion with the United Nations.

The committee issued a statement calling attention to recent conferences in Washington during which a number of United States airlines recommended "free and open" competition after the war.

"After a period of years," the statement said, "this healthy competition may well be possible and desirable but until then it is suggested that it would be wiser to adopt the joint committee's proposal for regulated competition."

The committee recommended each country have a fair allotment of planes with Britain and the United States having "parity in terms of a mutually accepted yardstick."

### SELECTED RECIPES

ALL-BRAN MOLASSES COOKIES

1 1/2 cup shortening  
1/2 cup brown sugar  
1 cup molasses  
1 cup All-Bran  
3 cups sifted flour  
1 tablespoon soda  
3/4 teaspoon salt  
4 cup cold water

Heat shortening until creamy. Add sugar gradually, mixing until thoroughly blended. Stir in molasses and All-Bran. Add sifted dry ingredients alternately with water, stirring to make a soft dough. Drop by heaping tablespoonfuls onto greased cookies sheet; flatten if desired. Bake in moderately hot oven (375 degrees F.) about 15 minutes.

Yield: About 3 dozen cookies 3 inches in diameter.

### AMBER MARMALADE

6 oranges  
2 lemons  
1 grapefruit  
5 quarts cold water  
4 cups sugar  
6 cups Crown Brand Corn Syrup

Wash fruits, remove peel and cut in very thin slices. Slice pulp thinly and set aside in a covered bowl. Cover peelings with cold water and let stand overnight. Next day bring to boiling point and add sugar and syrup (which have been heated gently together but not allowed to boil). Add also sliced fruit pulp. Cook rapidly, stirring very often, till marmalade gives the jelly test (about 3/4 hour). Yield: Approximately 5 pints.

The highest price ever paid for a single spoon in public auction was given recently at Christie's in London—an Edward IV. dated 1481 fetched \$5,850.

## RATION BOOK 3

— WHEN AND WHERE YOU GET IT

RATION BOOKS WILL NOT BE MAILED OR DELIVERED  
— THEY MUST BE CALLED FOR

For the convenience of the public and to ensure speedy distribution, Ration Book 3 will be issued locally at the distribution centres listed below.

### FOUR THINGS TO DO to get your new book

1 Fill in the application card—which is the first postcard in your present ration book. DO THIS AT HOME.  
2 PRINT clearly—do not write—the information required, and sign at the bottom with your usual signature. Follow the method on card illustrated.

### TO THOSE ON VACATION

If you are staying at a summer cottage, with friends or relatives, or at a hotel as a non-permanent guest, give your usual or permanent address on the application card.

3 Do not detach the card from your ration book. This must be done by an official at the Local Distributing Centre. If already detached, it should be brought in along with your present ration book.

4 Persons of 16 years or over must sign their own cards. Cards of persons under 16 years must be signed by parents or guardians. Children under 16 will not be allowed to apply for new ration books, either for themselves or for other members of the family.

Print in Block Letters in Ink  
(Ecrivez à l'encre en lettres bloquées)

Profile & Serial Number  
No de série (avec lettres) MWSJ4677

Last Name MORRISON

First Name JOHN HARRY

Address or R.R. No. 866 PARK AVE.

City, Town or Village MONTREAL P.Q.

Date AUG. 25/43

Age, if under 16  
Age, si moins de 16 ans

I declare I am the holder of the Ration Book from which this reference card has been taken, or that I am signing this in good faith on behalf of the holder, whose name and address appear above.

Je déclare être le détenteur du carnet de rationnement duquel cette carte de référence a été détachée, ou que je signe de bonne foi pour le détenteur dont les nom et adresse apparaissent ci-dessus.

J. H. Morrison  
(Signature—Signature)

IN FILLING IN YOUR APPLICATION CARD...  
FOLLOW THE METHOD INDICATED ABOVE.

DO NOT SURRENDER, DESTROY OR THROW AWAY YOUR PRESENT RATION BOOK. IT CONTAINS COUPONS YET TO BE USED FOR MEAT PURCHASES.

RESIDENTS OF RURAL AREAS may apply on behalf of their neighbours, providing Ration Book 2, and properly filled in application cards, are presented.

RESIDENTS OF A TOWN OR CITY. Any senior or responsible member of a household may apply for new Ration Books on behalf of other members of the household, providing Ration Book 2 and properly filled in application cards, are presented.

On presentation at a Distributing Centre of your present ration book with properly completed application card, you will be issued your new Ration Book 3; and your present Ration Book will be returned to you.

Volunteer Workers are giving their time to serve you at the Distributing Centres. Help them by following these instructions carefully.
